

## VISION

Education not only lays the foundation for a country's development and its competitive advantages; it also has the power to change lives, transform the world and promise a better life for its citizens.

The MOE has outlined two visions designed to create a better educational setting for future generations. The first vision is to provide a quality learning environment for our society's children so that they can grow up healthy and study happily. The second vision is to cultivate good citizens and to boost the international competitiveness of our country.

Acquiring literacy is an empowering process that enables our children to have access to knowledge and information which can broaden their horizons. Through this process they can enjoy a quality of learning which will better prepare them for their future and help them to gain confidence in themselves.

Children need full support from adults and teachers that care to help them to grow up to become well-balanced, sensitive and responsible human beings.

One of the most important functions of education is building up self-confidence,

an attitude that can be learned through experience. When students experience success, they tend to become successful. This expectation will lead them to have feelings of confidence.

Happy and confident children are able to grow into adults that exhibit great character and healthy self-esteem. As well-grounded adults, they will have the motivation to continue to pursue lifelong education, respect life, make contributions to their country, and create alternative ways to build a better life.
